Enterprise Risk Management

Risk Management is increasingly being recognized as the key for achieving and driving sustainable organizational performance, regardless if the organization is in the public sector or in the private sector and industrial domains. This Master programme is designed to provide formal education on contemporary Risk Management and its natural extensions to Crisis and Emergency Management.

Joint Master's degree offered by the Open University of Cyprus and Hellenic Open University.

Sustainable Energy Systems

The Joint M.Sc. programme introduces students to the fundamentals and the best available techniques and powerful modelling systems of the design and development of energy systems, as well as of the environmental and sustainable design of buildings. The programme is designed to stimulate and encourage novel and comprehensive solutions in the energy sector and the sustainable built environment, and it involves theoretical and hands-on learning methods aiming at producing skilled professionals who will be able to effectively enter the competitive European market of energy experts.

Joint Master's degree offered by Open University of Cyprus and Frederick University.

Cognitive Systems

Making machines that learn, think and act like humans. This programme aims to teach and help you investigate how to achieve this goal. Focusing on the new paradigm of cognitive computing, the programme brings together two main scientific areas: Cognitive Psychology and Artificial Intelligence in Computer Science. Aiming, on the one hand, for the prospective students to understand the basis for human cognition, the programme is strongly influenced by Cognitive Psychology, and includes modules that explore the fundamentals of perception, learning, mental representation, and reasoning in humans. Aiming, on the other hand, for the prospective students to be able to design cognitive systems, the programme places an emphasis on the investigation of computational methods and tools for understanding and designing cognitive systems, and includes modules from Connectionist and Symbolic Artificial Intelligence, from Machine Learning, and modules on recent developments in Cognitive Computing.

Joint Master's degree offered by the Open University of Cyprus and the University of Cyprus.

Adult Education for Social Change

This Erasmus Mundus International Master is a joint degree delivered and awarded by five Universities: University of Glasgow, University of Malta, Tallinn University, Maynooth University and Open University of Cyprus. The programme draws together the recognized strengths of the consortium partners into a relevant joint degree that engages with and responds to such issues as social inequality, migration and intercultural cooperation. It aims to deliver a curriculum that enables people to work with adults effectively and competently in changing socially diverse contexts.
